

**14th ANNUAL
GREEN
FUTURE
GALA**

Welcome

Our 2023 Green Future Gala focuses on **Building the Climate Economy**. Because the work of decarbonization is taking over as the engine for the entire commercial sector, our tent has grown bigger than ever, and that means there are whole new ways to do business.

NECEC has convened key figures, built relationships and accelerated startups to help take clean energy from a fond wish to the keystone for the coming decades of our economy. And we are centering diversity, equity, inclusion and justice in our work to make sure the economic and environmental benefits of a cleaner world reach everyone. This must be a movement of the many, by the many, for all. Expect to meet a whole new cross-section of people who very well might be the most important connections you make this year!

Our ecosystem is growing, as is the positive impact of the work our members and partners are doing. We will spend tonight spotlighting how we build a better future together.

Sincerely,

Joe Curtatone
President, NECEC

Building a Smarter, Stronger, Cleaner and More Equitable Energy Future

Every day at National Grid, our more than 6,500 team members work together to build a smarter, stronger, cleaner, and more equitable energy future for our customers and communities in more than 240 towns and cities across 5,900 square miles. We know what we do matters immensely, and how we do it matters even more.

National Grid recently submitted its proposal to modernize our grid and enable a more just energy future to ensure benefits for all. Our Future Grid plan helps to facilitate charging for more than one million EVs and 750,000 heat pumps, generates \$1.4 billion in economic activity, and creates 11,000 jobs.

Learn more about our Future Grid plan at **nationalgridus.com** and search 'grid modernization.'
